

KUNABATHULA PRADEEP SATHYA

Frontend Developer

8897541279 | kunabathulapradeepsathya@gmail.com

CAREER OBJECTIVE

Aspiring Front-End Developer seeking to begin a full-time role where I can apply my skills in React.js, JavaScript (ES6+), HTML5, CSS3, and Vite to build responsive, user-friendly web applications. Eager to contribute the practical experience gained from independently developing a 34+ product e-commerce platform and a 12-service booking application, including REST API integration, component-based architecture, and cross-browser design. Committed to continuous learning, including the use of AI-assisted development tools, to grow as a developer and deliver measurable value to a product team from day one.

SKILLS

Core Stack: React.js, JavaScript (ES6+), HTML5, CSS3, Vite, Responsive Web Design

Frontend Tools: Bootstrap Framework, CSS Modules, React Router, Context API, React Hooks (State Management)

Integration & Code Quality: REST APIs Integration, Component-Based Development, Reusable & Maintainable Code, Cross-Browser Compatibility

AI Tools: GitHub Copilot, ChatGPT, Claude, Cursor AI — used for code assistance, debugging, prompt-based learning, and boosting development speed

Tools & Platforms: Git & GitHub, Vercel, VS Code

Soft Skills: Quick Learner, Problem Solving, Team Collaboration, Adaptability

PROJECTS

Shop Easy — E-Commerce Website

Tech: React.js | Vite | JavaScript | CSS Modules | React Router | Context API | React Hooks

- Built a React.js e-commerce platform with 34+ products across 10 categories.
- Implemented Cart, Wishlist, Search, Filters, and Checkout functionality.
- Developed an Admin Dashboard for product and order management.
- Used Context API and React Hooks for state management.

Quick Serve — Service Booking Platform

Tech: React.js | Vite | JavaScript | CSS Modules | React Router | Context API | Bootstrap

- Developed a responsive home & business service booking platform covering 12 services, including AC Repair, Home Cleaning, Electrical, Plumbing, Pest Control, and CCTV Installation.
- Built a 3-step booking flow — Customer Details, Date & Time Scheduling, and Review & Confirm — with a success confirmation page.
- Created a Technician Profiles page featuring verified badges, ratings, job counts, and skill tags.
- Implemented user Login/Register, a Dashboard with booking history, a Reviews page, and an interactive FAQ accordion.
- Delivered a fully responsive design with scroll animations and a gold-and-navy brand theme using CSS Modules.
